

Now a sharp-looking steel finish inside and out!

Ideal Roofing's SUPREME INTERIOR LINER is a vital part of the insulated "sandwich wall system" supporting the insulation and sealing off the building from the inside. Sharp looking, clean and attractive from inside the building, the SUPREME INTERIOR LINER is cut to your exact specifications and easy to install. It is manufactured in .021"/0.54mm thick to .038"/0.96mm thick steel panels with a **factory-caulked overlap** making the panel an effective air and vapour barrier.

No need to shop around: **notched "Z" bar fixations** with pre-punched holes, "U" channels, fasteners, trims and all required components of the "sandwich wall system" are also available from Ideal Roofing.
